

Evaluation Summary Form

Construction Site Stormwater Inspections Training for Municipal Inspectors Wednesday, March 20, 2018 9:00 a.m. – 1:00 p.m.

What Did You Think of the Following Presentations?

- **Field Station A - Inlet Protection** – *Dan Toda, Reed & Graham, Inc.*

33 very helpful **5** somewhat helpful **0** not helpful

- Good discussion about strengths and weaknesses of products
- Should provide more situation use and why to use or not use certain protection types
- Good practical information
- It was good to see the products being installed and listening to the presenter explain typical failures, issues in the field.

- 2. **Field Station B – Sediment and Erosion Control** –
Bryan Hoffman and David Franklin, Filtrexx, Inc.

35 very helpful **3** somewhat helpful **0** not helpful

- David was extremely competent, experienced and provided good insight
- Liked the demonstration showing different efforts for installation
- Field demonstrations is extremely helpful

- 3. **Classroom - Construction Site Regulations and BMPs** –
Peter Schultze-Allen & Kristin Kerr, EOA Inc.

30 very helpful **8** somewhat helpful **0** not helpful

- I have seen the presentation a few times before, still very informative for those just being introduced to C.6
- Need to add more value than just reading slides
- Good reminders of what to look for and how to set things up.
- Straight forward and good pacing.

Did this workshop meet your expectations?

Yes 38

No 0

Please submit at the end of the workshop. *Thank You for Your Comments!*

Suggestions for future workshop topics:

- More hands on field presentations
- Some products (field session) has a “name tag” in front of them, some don’t.
- It’d be nice if all products had a “name tag”
- More pictures (examples) in slides
- Quicker slides and show failed BMP’s and good BMPs
- Send save the date A.S.A.P
- Field demos better than past group exercises
- Since the MRP will upgrade to 3.0 soon perhaps get some idea of changes the Water Board is looking at and share with us (data needs, funding, staffing, etc.)
- Permit process?
- It was great to have live demonstrations and see the different materials and how they are installed and work.
- Bigger conference room (2)
- I really enjoyed the outdoor presentation. It would be nice to continue doing those.
- BMP’s for commercial and industrial sites
- Covering grease barrels, secondary containment, covering of materials (metals etc.)
- Detailed exploration for each BMP

General Comments:

- The inlet protection felt almost like a sales pitch
- The demonstrations were very helpful in putting what was taught in the classroom into perspective.
- Thanks (4)
- Good job! (5)
- Very helpful & Informative!
- Need a bigger room
- Very good workshop.
- Learned a lot!
- Very informative class
- Field Station B, the best I have been to.
- Station A was very good also
- Thought the use of field exercise/tutorials was very effective and would be nice to use the same approach in C.4/C.5 or C.3 workshops (if possible)
- Only drawback was airplane noise at times.
- Field stations felt too much towards selling the product more than informative, but still good, and good seeing a line presentation
- Best field session eve, Even rain!
- Will return
- Good sell on the pros/cons of the materials and supplies
- Very helpful seeing the application in field.
- Understanding application do/don’ts
- Send reminder earlier
- I really learned through the field demonstrations/sessions
- Excellent training, figured out cost of BMP’s and what they may be used best for.
